# Advanced Extraction Suite

Say good-bye to manual typing. Automatically extract and cross-reference data to the source document regardless of its format in just one click. Improve the efficiency and accuracy of your workpapers.

DataSnipper add-on module

Eliminate time-consuming manual work

The Advanced Extraction Suite contains 3 powerful features that automatically detect and extract the required data from invoices, receipts and contracts regardless of their layout with just a single click. By placing the data as Snips, it creates references to the source document, directly in the Excel workbook.

Features powering the Advanced Extraction Suite

Invoice Extraction

Replace manual typing and automatically extract data from invoices such as invoice ID, invoice date, the amount due, and many more with Invoice Extraction.

Receipt Extraction

Leverage text recognition and extract data from receipts such as Merchant Name, Totals, Transaction Date, and many more, regardless of the receipt's layout.

Contract Extraction

With Contract Extraction, you can automatically extract data from contracts such as Effective Date, Execution Date, Title, Jurisdictions, and many more instantly.

Loved by audit and finance professionals across the globe
