# DataSnipper Platform v6

Improve the speed and quality of your audit and finance procedures with the latest improvements on the DataSnipper Platform.

datasnipper

Snip all Tables

With a single click, extract all tables of varied sizes into a single Excel workbook with improved Table Snip capabilities. View the tables sequentially alongside its source page information in the same page. You can also easily adjust the sizes of rows and columns to your preference using a slider on your source document.

Onboarding Panel

Watch animations to quickly see certain DataSnipper features in action for the first time when you start your DataSnipper journey. To start, click 'Getting Started' under the 'Learn' button in the DataSnipper ribbon and then select 'Show Onboarding'.

Improved OCR Capabilities

DataSnipper's Text Recognition is now better equipped to support non-Latin languages read from right to left. This means that you can now extract and validate data from source documents in Arabic, Hebrew, Greek and more.
