Financial Statement Suite

Improve the speed and quality of your Financial Statement Procedure

A separate DataSnipper platform module

datasnipper

The opportunity

Auditorswaste valuable time by using calculators, manually searching for errors, andcomparing financial statements. It's time for next-gen "tick andtie". The Financial Statement Suite automatically analyzesthe financial statement and helps to both perform and document all financialstatement procedures extremely fast, while relying on the auditor's judgement – improving standardization and the overall quality of service.

Save time

Speed up the Financial Statement Procedure by 3x with intelligent automation.

Standardize processes

Drive standardization to increase quality and decrease turnaround time.

Automate for efficiencies

Automate repetitive tasks, while relying on the auditor's judgement.

Top features powering the Suite

Verify mathematical accuracy

Automatically verify mathematical accuracy with auto-suggestions and internally calculate to review.

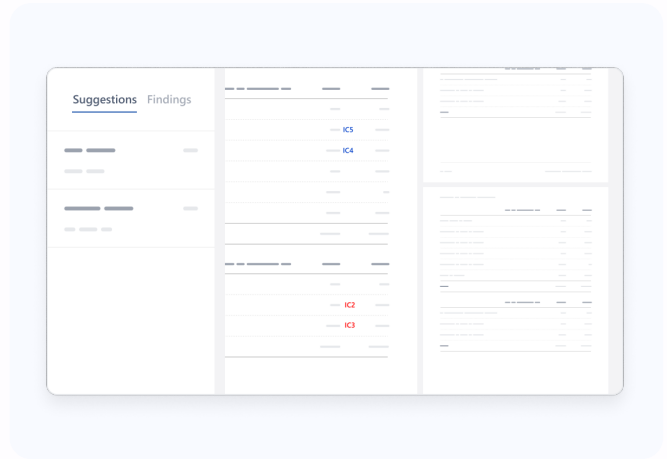

Review internal consistency

Easily review internal consistency with auto-lookup and matching. Simply click through figures and refer to respective notes.

datasnipper

Check prior year consistency

Instantly check prior year consistency with auto-comparison and page-by-page matching.

> *"The Financial Statement Suite provides major efficiency improvements and is offering features that truly support our teams in analyzing financial statements at scale. It drives the standardization of our procedures to increase overall quality of service."*

Marco de Kruijk
Senior Manager Audit & Assurance at BDO
